

Clean water, sanitation and environmental education in Brazil: local initiatives can change local realities

Aline Gomes Zaffani

What are the threats to water safety in a huge tropical country, such as Brazil? In this presentation, I will show you the main challenges regarding water and sanitation, and how projects from Universities and NGOs are helping us.

Date: Thursday, July 15th at 4 PM

Room code:

About me

Affiliations: PhD candidate at the University of Sao Paulo, Project coordinator at Veracidade Association (NGO), Consultant at The Green Initiative (NGO), and Gaia Social (NGO).

I'm a Brazilian environmentalist, teacher, and researcher interested in sharing knowledge and dealing with water issues to improve conservation and awareness. I've been working with different NGOs for the past 8 years on projects to provide environmental education, improve sanitation, and promote actions to increase water and soil conservation, mainly in rural areas.
