

The Leibniz Centre for Tropical Marine Research (ZMT) GmbH (www.leibniz-zmt.de) is an independent research and teaching institute that provides scientific knowledge for the protection and sustainable use of tropical coastal ecosystems. To this end, we work in an inter- and transdisciplinary manner with our partners in the tropics. The ZMT is a member of the Leibniz Association.

ZMT's approach require – across all areas of its mission – intensive dialogue between science and stakeholders from politics, business, and civil society in Europe as well as in ZMT's tropical partner countries. The targeted identification of dialogue and cooperation partners is a prerequisite for building long-term, trust-based relationships, providing knowledge transfer services of all kinds, and supporting capacity development. This is the core task of the Office for Knowledge Exchange. Its remit ranges from strategic direction to operational implementation.

This vacancy is continuously open. We offer internship positions for students completing a required internship.

Intern (gn) in the Office for Knowledge Exchange (OKE) **Full-time or part-time** (Reference number: OKE-Pflichtpraktikum)

Your tasks include:

- Project work to be defined, e.g., in the areas of policy advice or environmental education
- Support for advising and working with political and civil society partners
- Conducting research and summarizing the state of play on specific topics
- Maintaining project databases and project materials
- Supporting event planning and implementation
- Maintaining the OKE website
- Supporting internal and external communications
- Other tasks as they arise

Requirements

- Enrolment in a degree program in environmental sciences; political, economic or social sciences; or journalism
- Proof of a required internship or project module
- Careful and independent working style
- Good written and spoken German and English
- Good MS Office skills
- Flexible hours

We offer

- Comprehensive insights into science management at the interfaces between science, society, and business
- Direct interaction with stakeholders from academia, politics, business, civil society, development cooperation, and other sectors
- An understanding of the broader role and impact of science within society
- A wide range of tasks to expand your knowledge and skills
- A friendly and supportive team
- A dynamic, interdisciplinary, and international environment
- Family-friendly working conditions with certification under the "Work and Family" audit

For subject-related enquiries, please contact Ms. Rebecca Lahl, email: rebecca.lahl@leibniz-zmt.de. This internship posting is an open, ongoing call; the position is unpaid by agreement. The duration of the required internship is determined by the study and examination regulations of your university. If interested, please contact Ms. Lahl and include your CV and, if possible, proof that the internship is required under your university's study and examination regulations. The ZMT values diversity and pursues the goal of equal opportunities, which also includes gender neutrality (gn).

Please send your complete documents by email (quoting the reference number "OKE-Pflichtpraktikum" and combining them into a single PDF file) to Rebecca Lahl, email: rebecca.lahl@leibniz-zmt.de.
